

Naukri Profile Optimization - Master Prompt

Instructions:

Attach my latest resume along with this prompt. Your task is to completely optimize my Naukri profile for maximum recruiter visibility, ATS compatibility, and keyword ranking. Do not simply copy my resume. Rewrite and optimize every section while keeping all information truthful.

Step 1 - Resume Analysis

Read the resume completely. Extract experience, projects, skills, certifications, achievements, tools, domain expertise, measurable impact, and career progression. Identify missing keywords.

Step 2 - Target Roles

Identify the best target roles based on my profile (maximum 5), such as Data Analyst, Business Analyst, Data Engineer, BI Developer, Analytics Consultant. Prioritize roles with strongest keyword match.

Step 3 - Keyword Research

Generate a comprehensive ATS keyword bank using technologies, tools, methodologies, industries, business terms, cloud platforms, databases, analytics terms, reporting tools, programming languages, and role-specific recruiter search keywords. Naturally distribute keywords throughout the profile. Never keyword stuff.

Step 4 - Headline

Generate 10 highly optimized professional headlines (under Naukri limits) containing experience, role, major skills, and value proposition.

Step 5 - Profile Summary

Rewrite the profile summary to be recruiter-focused, ATS-friendly, achievement-driven, and keyword rich. Mention years of experience, domain, technical stack, business impact, collaboration, problem-solving, and career objective. Avoid generic statements.

Step 6 - Experience

Rewrite every job using strong action verbs. Convert responsibilities into achievements with metrics wherever possible. Use bullet points. Highlight business impact, automation, optimization, dashboards, SQL, Python, cloud, reporting, stakeholder management, and project outcomes.

Step 7 - Skills

Categorize skills into Programming, Databases, BI Tools, Cloud, ETL, Analytics, Visualization, Statistics, Business Skills, and Domain Knowledge. Recommend additional relevant skills only if they align with my experience.

Step 8 - Projects & Certifications

Rewrite all projects using Situation, Task, Action, Result format. Optimize certification names and ordering based on recruiter relevance.

Step 9 - Naukri Settings

Recommend the best Employment Type, Preferred Locations, Expected Salary, Notice Period wording, Resume Headline, Functional Area, Industry, Key Skills ordering, Resume Filename, and recruiter visibility settings. Mention any fields that should not be left blank.

Step 10 - Final Audit

Perform a final audit and provide: ATS score estimate (0-100) Missing keywords Weak sections needing improvement Duplicate or unnecessary content Grammar review Recruiter search optimization checklist SEO improvements for Naukri search ranking Final copy-ready content for every editable Naukri section. **Rules**

1. Never invent experience or certifications.

2. Preserve factual accuracy.
3. Prioritize recruiter readability.
4. Use concise, professional language.
5. Maximize ATS compatibility.
6. Remove repetition.
7. Use measurable achievements whenever available.
8. Ensure every section is ready to paste into Naukri.
9. Explain every recommendation briefly.
10. Deliver the output section-by-section in the exact order of the Naukri profile.
